### My-Project

Project Name: **Best player selected**      [Live site](#)      [github link](#)

- This project is made using JavaScript only
- Clicking the button will add the player list on the side, each player can be selected once, and maximum 5 players can be selected.
- There are input fields for each player's value, manager and coach's costs, all of which have calculators used to calculate income expenditure.

Project Name: **web Developer learning**      [Live site](#)      [client side link](#)      [server side link](#)

- I used React Router DOM
- I used react form in login firebase system, React Twist
- I have created the data on the server side

Project Name: **sport photograper**      [Live site](#)      [client side link](#)      [server side link](#)

- I have used Tailwind, Mamba UI
- I created a page called 404
- I have created a private route

### Professional goal

I am a junior web developer. I like to code programming. I have created various types of websites with Javascript and React. I love my work very much.
